

Career Coach — Screen Mockups

All 7 screens from the UX Design workshop (Workshop 7 of 9), in navigation order. Source mockups: [mockups/*.svg](#). Full traceability to Gherkin Then / When clauses is in [07-ux-design.md](#); this document is a print/PDF-friendly companion showing every screen with a plain-language description underneath.

1. Intake Interview

Career Coach

Strategy Plan

Positions

Applications

Interview Prep

Intake Interview

Answer these questions to build your Strategy Plan

Location preference

Remote only

Target salary range

\$150,000to\$180,000

Company size

Mid-size to enterprise

Tech stack preference

Full-Stack TypeScript, Angular, NestJS

Career-coach best-practice questions

e.g. "What's non-negotiable vs. flexible?"

Build My Plan

Purpose: The entry point to Career Coach. A Job Seeker answers a short set of structured questions that becomes their Strategy Plan's Requirement Set.

Key elements:

- Left-hand nav showing the five app sections (Strategy Plan, Positions, Applications, Interview Prep, Negotiation), with the current section highlighted.
- **Location preference** — free-text field, pre-filled example: "Remote only."
- **Target salary range** — two linked fields (low/high), pre-filled example: "\$150,000–\$180,000."
- **Company size** — free-text field, pre-filled example: "Mid-size to enterprise."
- **Tech stack preference** — free-text field, pre-filled example: "Full-Stack TypeScript, Angular, NestJS."
- **Career-coach best-practice questions** — an open textarea prompting the Job Seeker with guidance like "What's non-negotiable vs. flexible?"
- **Build My Plan** button — primary call to action at the bottom.

Interaction: Submitting "Build My Plan" records a Requirement Set for the Job Seeker and navigates to the Strategy Plan screen. This same field layout is reused (not separately mocked) as the "Revise Plan" edit form reachable from Strategy Plan.

2. Strategy Plan

Career Coach

Strategy Plan

Strategy Plan — PLAN-01

Location preference

Remote only

Target salary range

\$150,000 – \$180,000

Company size

Mid-size to enterprise

Tech stack preference

Full-Stack TypeScript, Angular, NestJS

Revise Plan

Recent revision

Target salary range narrowed to \$140,000 – \$165,000 after reviewing feedback on Position POS-2203.

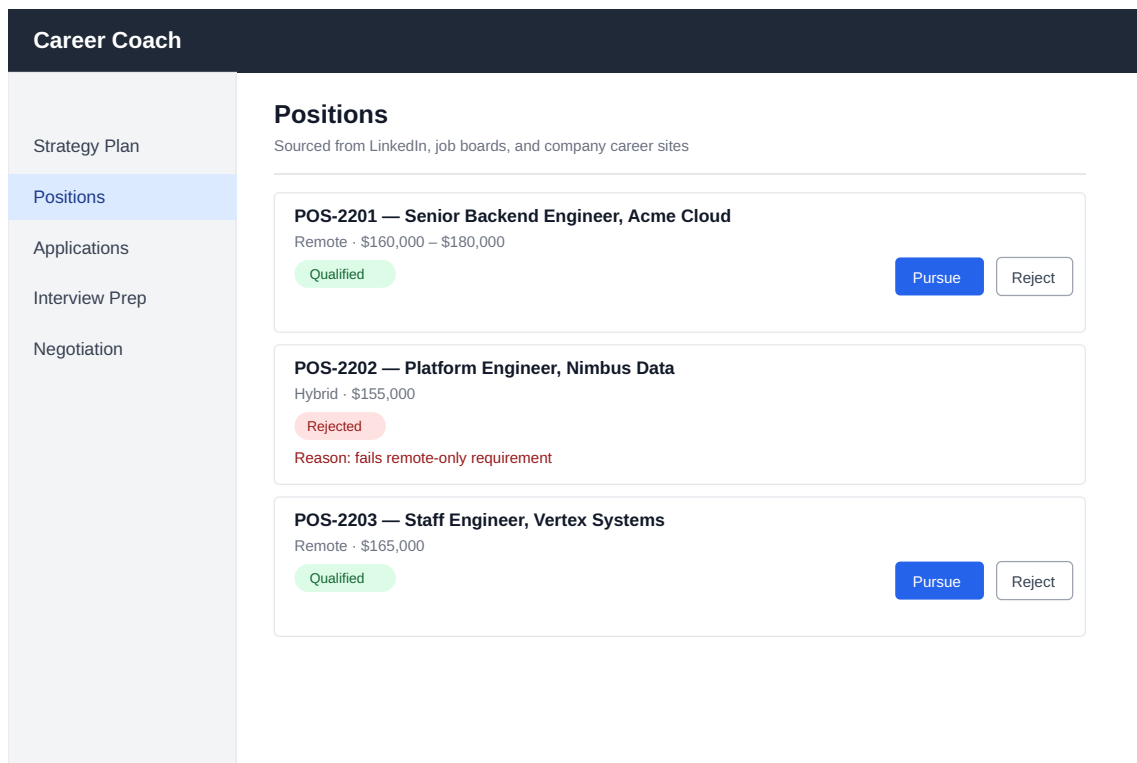

Purpose: The durable record of a Job Seeker's stated requirements (PLAN-01) — the single source of truth every other screen in the app measures Positions, Applications, and Offers against.

Key elements:

- Four read-only fact rows mirroring the Intake Interview's answers: location preference, target salary range, company size, tech stack preference.
- **Revise Plan** button — opens the Intake Interview's field layout pre-filled with current values, for editing.
- **Recent revision** banner (green) — appears after a revision, stating the specific field that changed (e.g. salary range narrowed to \$140,000–\$165,000) and which Position's feedback prompted it (e.g. POS-2203).

Interaction: This screen is both a starting point (nothing to pursue yet) and a return destination — a rejected Position with feedback can update the Requirement Set here, which is what produces the revision banner. Negotiation Assistance later references PLAN-01's salary range without navigating back to this screen.

3. Positions

Purpose: The shared hub screen for sourcing, qualifying, and acting on job Positions — one list, several row-level states, reused across three Gherkin Features (Source, Qualify, Give Feedback).

Key elements:

- A list of Position cards, each showing: title/company, remote/hybrid + salary snippet, a colored status badge, and (when Qualified) Pursue / Reject action buttons.
- **Qualified** badge (green) — e.g. POS-2201, POS-2203 — both actions enabled.
- **Rejected** badge (red) — e.g. POS-2202 — with the specific rejection reason shown directly beneath the row (e.g. "fails remote-only requirement"), not hidden behind a click.

Interaction: Pursue on a Qualified row moves that Position to Application Review. Reject opens an inline feedback-note field (not separately mocked); submitting it is what produces the Strategy Plan's revision banner. A freshly Sourced Position (before qualification finishes) is a transient state shown one badge earlier than Qualified/Rejected — not worth a separate mockup.

4. Application Review

Review Application — APP-3301

For POS-2201 — Senior Backend Engineer, Acme Cloud

Prepared

Full name

Jordan Blake

Resume

jordan-blake-resume.pdf

Cover letter (drafted)

"I'm excited to bring my backend engineering experience to Acme Cloud's platform team, particularly around..."

This application will be submitted from your own Acme Cloud account — nothing is submitted automatically.

Submit Application

Edit Fields

Purpose: Where a drafted Application is reviewed and, crucially, deliberately submitted by the Job Seeker themselves — never on their behalf automatically.

Key elements:

- **Prepared** badge (amber) at the top.
- Populated **Full name**, **Resume**, and **Cover Letter (drafted)** fields.
- A blue callout stating explicitly: *"This application will be submitted from your own Acme Cloud account — nothing is submitted automatically."*
- **Submit Application** (primary) and **Edit Fields** (secondary) buttons.

Interaction: This is the single most important screen for communicating the hybrid-submission architecture decision (AD3) — the callout exists specifically so the Job Seeker never mistakes this step for full automation. Submitting moves the Application into the Application Pipeline with status Submitted.

5. Application Pipeline

Career Coach

Strategy Plan

Positions

Applications

Interview Prep

Negotiation

Application Pipeline

APP-3301 advanced to PhoneScreen — Acme Cloud
Notified just now

APP-3301 — Senior Backend Engineer, Acme Cloud

SubmittedPhoneScreenHiringManagerSub.InterviewOffer / NoOffer

Other Applications

APP-3298 — Staff Engineer, Vertex Systems
Rejected at Submitted stage

Purpose: Tracks a submitted Application's progress through hiring stages over time, and surfaces other in-flight Applications for comparison.

Key elements:

- A blue notification banner announcing the most recent stage change (e.g. "advanced to PhoneScreen").
- A horizontal **stage tracker**: Submitted → PhoneScreen → HiringManagerSub. → Interview → Offer/NoOffer, with the current stage highlighted.
- **Other Applications** section — a second list showing sibling Applications and their own status, including rejections with the specific stage the rejection occurred at (e.g. "Rejected at Submitted stage" for APP-3298) rather than a generic rejected flag.

Interaction: Reaching an Interview-family stage unlocks Interview Prep for that Application; reaching Offer unlocks Negotiation Assistance. The stage tracker advances in place — this is the same screen re-rendered at each stage, not a new screen per stage.

6. Interview Prep

Career Coach

Strategy Plan

Positions

Applications

Interview Prep

Negotiation

Interview Prep — APP-3301

Acme Cloud — Senior Backend Engineer

Stage: PhoneScreen

Focus for this stage

Screening-level: background, logistics, and high-level fit

- Walk through your background at a high level (2 minutes)
- Confirm remote-work logistics and availability to start
- Explain interest in Acme Cloud's platform team specifically
- Have 2 clarifying questions ready about team structure

Later stages of this same application will receive different, deeper prep once APP-3301 advances (e.g. FinalInterview).

Purpose: Delivers interview preparation content tailored to the Application's current pipeline stage — screening-level guidance early, deeper guidance later.

Key elements:

- **Stage: PhoneScreen** badge (amber).
- **Focus for this stage** summary line: "Screening-level: background, logistics, and high-level fit."
- Four bulleted, concrete prep points (e.g. "Walk through your background at a high level (2 minutes)," "Confirm remote-work logistics and availability to start").
- A footnote stating that later stages of the same Application (e.g. FinalInterview) will receive different, deeper prep content once it advances.

Interaction: Only reachable once the Application Pipeline shows an interview-family stage. The FinalInterview variant is not separately mocked — the footnote on this same screen satisfies the "distinct from PhoneScreen prep" requirement without needing a near-identical second mockup.

7. Negotiation Assistance

Career Coach

Strategy Plan

Positions

Applications

Interview Prep

Negotiation

Negotiate Offer — APP-3301

Acme Cloud — Senior Backend Engineer

Stage: Offer

Offer

\$172,000 base + \$10,000 signing bonus

Your Strategy Plan target (PLAN-01)

\$150,000 – \$180,000

\$172,000 is within your target range

Negotiation talking points

- Base meets your target — no need to push on salary alone
- Ask about earlier start-date flexibility
- Confirm PTO policy details — not explicitly ranked in your Plan
- Consider countering the signing bonus if relocation applies

Draft Response

Purpose: Helps the Job Seeker evaluate and respond to a received Offer against their Strategy Plan's stated target range.

Key elements:

- **Stage: Offer** badge (green).
- The offer itself, e.g. "\$172,000 base + \$10,000 signing bonus."
- **Your Strategy Plan target (PLAN-01)** — the target range shown directly alongside the offer for comparison (e.g. \$150,000–\$180,000), referencing PLAN-01 without navigating to the Strategy Plan screen.
- A green callout: "\$172,000 is within your target range." (A below-range offer reuses this same callout in a red/amber treatment — the same visual pattern Positions already uses for qualified vs. rejected — so it isn't separately mocked.)
- **Negotiation talking points** — four bulleted, specific suggestions, including terms PLAN-01 didn't explicitly rank (start date, signing bonus, PTO).
- **Draft Response** button.

Interaction: Only reachable once the Application Pipeline reaches Offer. Depends on both Feature 6 (Pipeline reaching Offer) and Feature 1 (PLAN-01 already existing).

Print / PDF

To generate a PDF from this file: open it in VS Code with a Markdown preview extension that renders relative SVG image paths (e.g. "Markdown PDF") and export, or run:

```
npx md-to-pdf docs/planning/career-coach/iterations/01/screen-mockups.md
```

from the repo root — this preserves the relative `mockups/*.svg` image paths.
